

Building Sand

Technical data sheet

Heidelberg Materials building sand is the ideal solution for concrete and block paving.

A washed sand conforming to BS EN 13139 Aggregates for mortar. The typical moisture content is 7.5%. It is used in the production of mortar for the construction of masonry brick and block work.

Pack size

Available in Maxipack and Bulk bags

Mix Design

For detailed advice on mortar mixes and their constituent materials please consult BS 998 Part 2. For general guidance refer to www.packedproducts.heidelbergmaterials.co.uk/en/products/sands/building-sand

Health and safety

As with all naturally-occurring silica sands, small amounts of respirable silica may be present. If inhaled in excessive quantities over extended periods, respirable silica can constitute a long-term health hazard. Refer to full Material Safety Data Sheet for further information. For cementitious mixes, follow health and safety advice detailed for cement.
