

Silver Sand

Technical data sheet

Heidelberg Materials silver sand is used as plant bedding, top dressing for lawns, compost when mixed with peat and other decorative uses.

A washed, lime-free nominal 1mm, light-coloured silica sand. The typical moisture content is 4.5%.

Pack size

Available in Maxipack and Bulk bags

Mix design

For detailed advice on mortar mixes and their constituent materials please consult BS EN 998 Part 2. For general guidance refer to www.packedproducts.heidelbergmaterials.co.uk/en/products/base-aggregates/silver-sand

Health and safety

As with all naturally-occurring silica sands, small amounts of respirable silica may be present. If inhaled in excessive quantities over extended periods, respirable silica can constitute a long-term health hazard. Refer to full Material Safety Data Sheet for further information.
